**EQUIPMENT**

- 4 scooters
- Marker cones
- Large cones for inner track
- Small obstacles

**SCOOTER GRAND PRIX**

**RACE RULES**

- Each team of two have one scooter
- The race is made up of ten laps of the track
- Each team member must complete the same number of laps
- Each team member can complete no more than 4 laps in a row before making a ‘pit stop’ and changing with their partner
- If you move into and make contact with another scooter you will receive a red cone which means you will have a pit stop time penalty
- The first team to complete ten laps win

**STRATEGY**

- Make a judgement - how many laps can you do before you slow start to slow down? - when would you need to change with your partner?
- Do you want to be fresher at the start, in the middle of the race or at the end? How can you break up your laps to achieve this with your partner?
- On which part of the track can you speed up? On which parts do you need to slow down to maintain control to keep a good racing line?
- Where is the quickest racing line for your team?

**LEARNING THEME**

- Make a judgement - how many laps can you do before you slow start to slow down? - when would you need to change with your partner?
